

AHMAD ABDALLAH

Lead Game Programmer **Unity Certified Expert** MSc Virtual Reality Design

[+971-58-514-9513](tel:+971-58-514-9513) | Ahmadabobakr@gmail.com | linkedin.com/in/ahmadabobakr | ahmadabobakr.github.io

PROFESSIONAL SUMMARY

Unity Certified Expert Programmer with **10+ years** architecting production game systems and VR applications, from commercial titles to enterprise multiplayer simulations. Specialize in **scalable gameplay frameworks, ScriptableObject-driven architectures, and designer-facing tooling** that ships. Proven track record leading cross-functional teams, owning end-to-end delivery, and mentoring developers across studios and agencies.

CORE COMPETENCIES

Specializations VR Interaction Frameworks, Multiplayer Networking, Gameplay Systems Architecture, ScriptableObject-Driven Design, Designer-Facing Tooling, Performance Optimization

Technical Stack Unity, C#, C++, URP, Shader Graph/HLSL, XR Interaction Toolkit, Hand Tracking, Nakama Networking, UniRx, UniTask, Blender, JavaScript, Three.js, A-Frame, Git, Visual Studio

PROFESSIONAL EXPERIENCE

Technical Lead Shababeek Labs FZ LLC, Abu Dhabi 2025 – Present

- Architect enterprise VR training simulations in Unity, including **multiplayer FPS proof-of-concepts** for government and defense sector clients.
- Define end-to-end technical strategy: project architecture, interaction frameworks, multiplayer networking, and deployment pipelines.
- Built and lead a cross-functional team of developers and designers.

XR Technical Consultant Toptal — Remote 2022 – Present

- Advise studios and enterprise teams on VR/AR architecture, technology selection, and scalable project structure
- Lead technical reskilling engagements — transitioning traditional game teams to VR pipelines
- Conduct architecture reviews and establish coding standards for XR codebases

Head of Games Dev & XR Department. SAE University College, Dubai 2022 – 2025

- Led department strategy, curriculum design, and a team of lecturers across game development and XR programs
- Established industry partnerships and oversaw capstone projects in Unity, VR, and multiplayer systems

Senior Mobile Game Developer Big Viking Games, Canada — Remote (Contract) Feb – Sep 2022

- Took a multiplayer casual mobile game from **prototype to production-ready** — covering UI, gameplay systems, polish, and networking
- Built multiplayer infrastructure using **Nakama**, and applied **UniRx and UniTask** for reactive and asynchronous gameplay logic
- Introduced **MVC architecture** to the Unity codebase, improving testability and separation of concerns across feature teams

Senior VR Developer — Highstreet, Canada — Remote

Jun 2021 – Jan 2022

- Re-designed the **core system architecture** of a live, large-scale metaverse product to support sustainable feature scaling
- Designed a **data-driven interaction system** using ScriptableObject architecture, enabling designers to build complex VR experiences without writing code
- Helped recruit and onboard the core engineering team, contributing to technical interviews and hiring decisions

Game Development Lecturer — SAE University College, Dubai

2019 – 2021

- Taught Unity, gameplay programming, and XR development across undergraduate game development cohorts
- Mentored student teams through full-cycle game projects, from architecture and prototyping to ship

Senior Game Developer — Kandooz Studio, Egypt

2017 – 2020

- Drove Unity development of commercial games and applications from concept through launch
- Built and published **Kinteraction** on the Unity Asset Store — a VR interaction toolkit (hand-pose constraints, socket systems, lifecycle management) used by **thousands of developers**
- Owned code quality, architecture decisions, and delivery timelines for the development team

Technical Supervisor & Lecturer — Information Technology Institute (ITI), Egypt

2015 – 2018

- Supervised technical curriculum across Unity, DirectX, OpenGL, and C# — bridging low-level graphics with engine-level development
- Mentored 4+ cohorts through capstone game projects from architecture to ship

KEY TECHNICAL PROJECTS

Custom VR Interaction Framework

ScriptableObject-driven architecture featuring event/variable binding, interactable lifecycle management, hand-pose constraints, socket systems, and locomotion modules. Deployed across multiple commercial VR products.

Enterprise VR Training Simulation

Architected a large-scale Unity multiplayer FPS training program for a government client, covering the full pipeline from interaction design to networked deployment.

Event Installations & Custom Hardware

Delivered interactive installations and exhibition experiences integrating Unity with custom hardware devices including bespoke controllers, sensor rigs, and physical input/output peripherals for live audience engagement.

EDUCATION

MSc Virtual Reality Experience Design: Middlesex University

2023

Post Graduate Diploma, Computer Engineering: Arab Academy for Science, Technology & Maritime Transport

2017

Post Graduate Diploma in Game Programming: Information Technology Institute

2015

BSc Computer Engineering: Modern Academy for Engineering and Technology

2011
